

## Troubleshooting

*“I don't see “Bluetooth Logickeyboard” on my Bluetooth device list”*

- Make sure Bluetooth is enabled on your device.
- Replace the batteries if they are power drained.
- Turn the power switch on the back of the keyboard to the position “On”.
- Ensure that the keyboard is within a 30 feet ~ 10 meters distance from your device.

*“After being kept idle for some time, my keyboard loses keystrokes”*

The keyboard goes to power saving mode after being idle for 15 minutes. After pressing any key there is a wake-up time of 4 seconds.

## How to set up

This keyboard is compatible to the Apple iOS software for use with an iPad and iPhone, or to the macOS software when used with Mac models. Follow the setup instructions below to connect your new keyboard, with attention to which type of device it is meant for use with.

### For use with iPad® and iPhone® (Apple iOS)

1. Install batteries in the keyboard, making sure that they are positioned according to the embedded directions in the battery cavity.
2. Turn the Power switch on the back of the keyboard to the "On" position.
3. Press and hold the "Connect" button on the back of the keyboard for 3 seconds until the LED indicator on the front of the keyboard flashes.
4. On your iPad / iPhone, go to Settings > Bluetooth and select "Bluetooth Logickeyboard" on your list of Bluetooth Devices, to start the pairing process.
5. A dialogue window appears on the iPad / iPhone with a four-digit code.
6. Type the four-digit code on your "Bluetooth Logickeyboard" followed by Return/Enter.
7. Your keyboard should now be listed as "Connected" on the Bluetooth Devices
8. In order to make your new Logickeyboard fully compatible to the iPad / iPhone iOS, type the key combination of Fn+Ctrl+W on your "Bluetooth Logickeyboard".

### For use with Mac® (macOS)

1. Install batteries in the keyboard, making sure that they are positioned according to the embedded directions in the battery cavity.
2. Turn the Power switch on the back of the keyboard to the "On" position.
3. Press and hold the "Connect" button on the back of the keyboard for 3 seconds until the LED indicator on the front of the keyboard flashes.
4. Open Bluetooth on your macOS and find "Bluetooth Logickeyboard" on your list of Bluetooth Devices, and click the "Pair" button to start the pairing process.
5. A dialogue window appear giving you a six digit pairing code
6. Type the six-digit code on your "Bluetooth Logickeyboard" followed by Return/Enter key.
7. Your keyboard should now be listed as "Connected" on the Bluetooth Devices list in your macOS
8. In order to make your new Logickeyboard fully compatible to the macOS, type the key combination of Fn+Ctrl+Q on your "Bluetooth Logickeyboard"
9. Your keyboard is now ready for use.
